

EMERGING AFRICAN NEWS

How best can U.S. Media inform us about Africa?

To celebrate the 23rd World Press Freedom Day, please join us for a community discussion about the important role of news in the promotion of growth and development in Africa. This event brings together local journalists, bloggers, professors and community leaders to seek answers and solutions to the marginalization of African news in the media today. The event is designed to open up more links with the media and education community in Colorado and to expand opportunities for engagement and understanding.
